CONTENTS

VOLUME 100 NUMBER 1 JANUARY 1985

Rapid Communications

311 **The amplified expression of factors regulating myogenesis in L6 myoblasts.** W. E. Wright

317 **On the association of glycoprotein Ib and actin-binding protein in human platelets.** J. R. Okita, D. Pidard, P. J. Newman, R. R. Montgomery, and T. J. Kunicki

322 **Bidirectional organelle transport can occur in cell processes that contain single microtubules.** M. P. Koonce and M. Schliwa

327 **Cell-adhesion molecule uvomorulin is localized in the intermediate junctions of adult intestinal epithelial cells.** K. Boller, D. Vestweber, and R. Kemler

333 **Changes in the distribution of a spectrin-like protein during development of the preimplantation mouse embryo.** J. S. Sobel and M. A. Alliegro

Regular Articles

1 **The total length of spindle microtubules depends on the number of chromosomes present.** R. B. Nicklas and G. W. Gordon

8 **Synthesis of the transferrin receptor by cultures of embryonic chicken spinal neurons.** G. J. Markelonis, T. H. Oh, L. P. Park, C. Y. Cha, C. A. Sofia, J. W. Kim, and P. Azari

18 **Gp 115, a glycoprotein isolated from chick blood vessels, is widely distributed in connective tissue.** A. Colombatti, G. M. Bressan, I. Castellani, and D. Volpin

27 **Intracellular translocation of fluorescent sphingolipids in cultured fibroblasts: endogenously synthesized sphingomyelin and glucocerebroside analogues pass through the Golgi apparatus en route to the plasma membrane.** N. G. Lipsky and R. E. Pagano

35 **Fate of microtubule organizing centers during in vitro myogenesis.** A.-M. Tassin, B. Maro, and M. Bornens

47 **Human erythrocyte myosin: identification and purification.** V. M. Fowler, J. Q. Davis, and V. Bennett

56 **Isolation of a cell-surface receptor for chick neural retina adherons.** D. Schubert and M. LaCorbiere

64 **Analysis of pre- and postsynaptic factors of the serotonin system in rabbit retina.** C. K. Mitchell and D. A. Redburn

74 **Microtubule-associated protein 2 (MAP2) within axons of spinal motor neurons: associations with microtubules and neurofilaments in normal and β,β'-iminodipropionitrile-treated axons.** S. Ch. Papasozomenos, L. I. Binder, P. K. Bender, and M. R. Payne

86 **A cellular binding site for the M_r 55,000 form of the human plasminogen activator, urokinase.** J.-D. Vassalli, D. Baccino, and D. Belin

93 **The organizational fate of intermediate filament networks in two epithelial cell types during mitosis.** J. C. R. Jones, A. E. Goldman, H.-Y. Yang, and R. D. Goldman

103 **Uptake of chemically modified low density lipoproteins in vivo is mediated by specific endothelial cells.** R. E. Pitas, J. Boyles, R. W. Mahley, and D. M. Bissell

118 **Immunocytochemical demonstration of ecto-galactosyltransferase in absorptive intestinal cells.** J. Roth, M. J. Lentze, and E. G. Berger

126 **Localization of tektin filaments in microtubules of sea urchin sperm flagella by immunoelectron microscopy.** R. W. Linck, L. A. Amos, and W. B. Amos

136 **Polarized delivery of viral glycoproteins to the apical and basolateral plasma membranes of Madin-Darby canine kidney cells infected with temperature-sensitive viruses.** M. J. Rindler, I. E. Ivanov, H. Plesken, and D. D. Sabatini

152 **Tissue-specific expression of distinct spectrin and ankyrin transcripts in erythroid and non-erythroid cells.** R. T. Moon, J. Ngai, B. J. Wold, and E. Lazarides

161 **Chronic denervation of rat hemidiaphragm: maintenance of fiber heterogeneity with associated increasing uniformity of myosin isoforms.** U. Carraro, D. Morale, I. Mussini, S. Lucke, M. Cantini, R. Betto, C. Catani, L. Dalla Libera, D. D. Betto, and D. Noventa

175 **Rod cells dissociated from mature salamander retina: ultrastructure and uptake of horseradish peroxidase.** E. Townes-Anderson, P. R. MacLeish, and E. Raviola

189 **Analytical study of microsomes and isolated subcellular membranes from rat liver. IX. Nicotinamide adenine dinucleotide glycohydrolase: a plasma membrane enzyme prominently found in Kupffer cells.** A. Amar-Costesec, M. Prado-Figueroa, H. Beaufay, J. F. Nagelkerke, and T. J. C. van Berkel

198 **Preferential outgrowth of central nervous system neurites on astrocytes and Schwann cells as compared with nonglial cells in vitro.** J. R. Fallon

208 **Structure of C-protein purified from cardiac muscle.** H. C. Hartzell and W. S. Sale

216 **Junctions between lens fiber cells are labeled with a monoclonal antibody shown to be specific for MP26.** D. F. Sas, M. J. Sas, K. R. Johnson, A. S. Menko, and R. G. Johnson

226 **Functional determinants in transit sequences: import and partial maturation by vascular plant chloroplasts of the ribulose-1,5-biphosphate carboxylase small subunit of *Chlamydomonas*.** M. L. Mishkind, S. R. Wessler, and G. W. Schmidt

235 **Membrane-related specializations associated with acetylcholine receptor aggregates induced by electric fields.** P. W. Luther and H. E. Peng

245 **Giant axonal neuropathy: a conditional mutation affecting cytoskeletal organization.** M. W. Klymkowsky and D. J. Plummer

251 **The rat liver mitochondrial DNA-protein complex: displaced single strands of replicative intermediates are protein coated.** G. C. Van Tuyle and P. A. Pavco

258 **Purification and general properties of the DNA-binding protein (P16) from rat liver mitochondria.** P. A. Pavco and G. C. Van Tuyle

265 **Cyclic AMP effects on cell-to-cell junctional membrane permeability during adipocyte differentiation of 3T3-L1 fibroblasts.** R. Azarnia and T. R. Russell

270 **Characterization of a myosin heavy chain in the conductive system of the adult and developing chicken heart.** A. González-Sánchez and D. Bader

276 **Purification of brain tubulin-tyrosine ligase by biochemical and immunological methods.** H. C. Schroder, J. Wehland, and K. Weber

282 **Does actin bind to the ends of thin filaments in skeletal muscle?** S. Ishiwata and T. Funatsu

292 **Identical distribution of fluorescently labeled brain and muscle actins in living cardiac fibroblasts and myocytes.** N. M. McKenna, J. B. Meigs, Y. Wang

297 **Basal bodies and associated structures are not required for normal flagellar motion or phototaxis in the green alga *Chlorogonium elongatum*.** H. J. Hoops and G. B. Witman

337 CORRECTION

VOLUME 100 NUMBER 2 FEBRUARY 1985

Rapid Communications

633 **Rapid endocytosis of the transferrin receptor in the absence of bound transferrin.** C. Watts

638 **Translatable mRNA for GP140 (a subunit of type VI collagen) is absent in SV40 transformed fibroblasts.** B. Trüeb, J. B. Lewis, and W. G. Carter

642 **The effects of heat shock on the cell cycle regulation of tubulin expression in *Physarum polycephalum*.** J. J. Carrino and T. G. Laffler

648 **Orthogonal arrays in normal and injured respiratory airway epithelium.** R. E. Gordon

652 **Isolation of a subpopulation of glycoprotein IIb-III from platelet membranes that is bound to membrane actin.** R. G. Painter, K. N. Prodouz, and W. Gaarde

Regular Articles

351 **Dissociation of the chemotactic and mitogenic activities of platelet-derived growth factor by human neutrophil elastase.** R. M. Senior, J. S. Huang, G. L. Griffin, and T. F. Deuel

357 **Site-specific maturation of enveloped viruses in L cells treated with cytochalasin B.** J. C. Brown and N. L. Salomonsky

364 **Interaction of the 70,000-mol-wt amino-terminal fragment of fibronectin with the matrix-assembly receptor of fibroblasts.** P. J. McKeown-Longo and D. F. Mosher

375 **Alpha-actinin from sea urchin eggs: biochemical properties, interaction with actin, and distribution in the cell during fertilization and cleavage.** I. Mabuchi, Y. Hamaguchi, T. Kobayashi, H. Hosoya, S. Tsukita, and S. Tsukita

384 **Neuronal regulation of astroglial morphology and proliferation in vitro.** M. E. Hatten

397 **Characterization of an apically derived epithelial membrane glycoprotein from bovine milk, which is expressed in capillary endothelia in diverse tissues.** D. E. Greenwalt and I. H. Mather

409 **Highly specific antibody to Rous sarcoma virus src gene product recognizes a novel population of $pp60^{v\text{-}src}$ and $pp60^{c\text{-}src}$ molecules.** M. D. Resh and R. L. Erikson

418 **Endothelial fenestral diaphragms: a quick-freeze, deep-etch study.** E. L. Bearer and L. Orci

429 **Adipocyte conversion of CHEF cells in serum-free medium.** J. J. Harrison, E. Soudry, and R. Sager

435 **Mobility of fluorescent derivatives of cytochrome *c* in mitochondria.** J. M. Vanderkooi, G. Maniara, and M. Erecinska

442 **Initial appearance and regional distribution of the neuron-glia cell adhesion molecule (Ng-CAM) in the chick embryo.** J.-P. Thiery, A. Delouvée, M. Grumet, and G. M. Edelman

457 **Reversal of the posttranslational modification on *Chlamydomonas* flagellar α-tubulin occurs during flagellar resorption.** S. W. L'Hernault and J. L. Rosenbaum

463 **Maize plastid photogenes: mapping and photoregulation of transcript levels during light-induced development.** S. R. Rodermel and L. Bogorad

477 **Sulfated proteoglycan synthesis by confluent cultures of rabbit costal chondrocytes grown in the presence of fibroblast growth factor.** Y. Kato and D. Gospodarowicz

486 **Effect of exogenous extracellular matrices on proteoglycan synthesis by cultured rabbit costal chondrocytes.** Y. Kato and D. Gospodarowicz

496 **MAP3: characterization of a novel microtubule-associated protein.** G. Huber, D. Alaimo-Beuret, and A. Matus

508 **Treatment of human cell lines with 5-azacytidine may result in profound alterations in clonogenicity and growth rate.** L. Olsson, C. Due, and M. Diamant

514 **Developmentally regulated mRNAs in 3T3-adipocytes: analysis of transcriptional control.** K. S. Cook, C. R. Hunt, and B. M. Spiegelman

521 **Assembled and unassembled pools of clathrin: a quantitative study using an enzyme immunoassay.** B. Goud, C. Huet, and D. Louvard

528 **The acrosomal membrane of boar sperm: a Golgi-derived membrane poor in glycoconjugates.** A. P. Aguas and P. Pinto da Silva

535 **Processing and lysosomal localization of a glycoprotein whose secretion is transformation stimulated.** S. Gal, M. C. Willingham, and M. M. Gottesman

545 **A 57,000-mol-wt protein uniquely present in nonproliferating cells and senescent human fibroblasts.** E. Wang

552 **Reconstitution of light-harvesting complexes and photosystem II cores into galactolipid and phospholipid liposomes.** S. G. Sprague, E. L. Camm, B. R. Green, and L. A. Staehelin

558 **Fc receptor–mediated binding and endocytosis by human mononuclear phagocytes: monomeric IgG is not endocytosed by U937 cells and monocytes.** D. H. Jones, J. Nusbacher, and C. L. Anderson

565 **Novel peripheral blood-derived human cell lines with properties of megakaryocytes.** D. A. Morgan and I. Brodsky

574 **Membrane morphogenesis in retinal rod outer segments: inhibition by tunicamycin.** S. J. Fliesler, M. E. Rayborn, and J. G. Hollyfield

588 **Gene amplification–associated cytogenetic aberrations and protein changes in vincristine-resistant Chinese hamster, mouse, and human cells.** M. B. Meyers, B. A. Spengler, T.-D. Chang, P. W. Melera, and J. L. Biedler

598 **Immunohistochemical localization of short chain cartilage collagen (type X) in avian tissues.** T. M. Schmid and T. F. Linsenmayer

606 **Anionized and cationized hemeundecapeptides as probes for cell surface charge and permeability studies: differentiated labeling of endothelial plasmalemmal vesicles.** N. Ghinea and N. Simionescu

613 **Heparin regulates the collagen phenotype of vascular smooth muscle cells: induced synthesis of an M_r 60,000 collagen.** R. A. Majack and P. Bornstein

620 **A 300,000-mol-wt intermediate filament–associated protein in baby hamster kidney (BHK-21) cells.** H.-Y. Yang, N. Lieska, A. E. Goldman, and R. D. Goldman

VOLUME 100 NUMBER 3 MARCH 1985

Rapid Communications

975 **Heparan sulfate proteoglycans are concentrated on the sinusoidal plasmalemmal domain and in intracellular organelles of hepatocytes.** J. L. Stow, L. Kjellen, E. Unger, M. Höök, and M. G. Farquhar

Regular Articles

669 **Isolation and partial characterization of human platelet vinculin.** G. C. Rosenfeld, D. C. Hou, J. Dingus, I. Meza, and J. Bryan

677 **Nerve growth factor– and epidermal growth factor–stimulated phosphorylation of a PC12 cytoskeletally associated protein in situ.** G. E. Landreth and G. D. Rieser

684 **Immunochemical demonstration that amino acids 360–377 of the acetylcholine receptor gamma subunit are cytoplasmic.** W. J. LaRochelle, B. E. Wray, R. Sealock, and S. C. Froehner

692 **Tropomyosin isoforms in chicken embryo fibroblasts: purification, characterization, and changes in Rous sarcoma virus–transformed cells.** J. J.-C. Lin, D. M. Helfman, S. H. Hughes, and C.-S. Chou

704 **Mutations in the cytoplasmic domain of the influenza virus hemagglutinin affect different stages of intracellular transport.** C. Doyle, M. G. Roth, J. Sambrook, and M.-J. Gething

715 **cAMP induces a rapid and reversible modification of the chemotactic receptor in *Dictyostelium discoideum*.** C. Klein, J. Lubs-Haukeness, and S. Simons

721 **Fluorescent gangliosides as probes for the retention and organization of fibronectin by ganglioside-deficient mouse cells.** S. Spiegel, K. M. Yamada, B. E. Hom, J. Moss, and P. H. Fishman

727 **Isolation of an actin-binding protein from membranes of *Dictyostelium discoideum*.** C. A. Stratford and S. S. Brown

736 **Rates of diffusion of fluorescent molecules via cell-to-cell membrane channels in a developing tissue.** R. G. A. Safranyos and S. Caveney

748 **Effect upon mitogenic stimulation of calcium-dependent phosphorylation of cytoskeleton-associated 350,000- and 80,000-mol-wt polypeptides in quiescent 3Y1 cells.** C. Sato, K. Nishizawa, T. Nakayama, and T. Kobayashi

754 **Comparison of Ca^{++}-regulated events in the intestinal brush border.** J. R. Glenney, Jr., and P. Glenney

764 **A polymer-dependent increase in phosphorylation of β-tubulin accompanies differentiation of a mouse neuroblastoma cell line.** D. L. Gard and M. W. Kirschner

775 **Partial purification and characterization of an actin-bundling protein, band 4.9, from human erythrocytes.** D. L. Siegel and D. Branton

786 **Antibodies against a lysosomal membrane antigen recognize a prelysosomal compartment involved in the endocytic pathway in cultured prolactin cells.** C. Tougard, D. Louvard, R. Picart, and A. Tixier-Vidal

794 **Interaction of the sperm adhesive protein, bindin, with phospholipid vesicles. I. Specific association of bindin with gel-phase phospholipid vesicles.** C. G. Glabe

800 **Interaction of the sperm adhesive protein, bindin, with phospholipid vesicles. II. Bindin induces the fusion of mixed-phase vesicles that contain phosphatidylcholine and phosphatidylserine in vitro.** C. G. Glabe

807 **A smooth muscle–specific monoclonal antibody recognizes smooth muscle actin isozymes.** A. M. Gown, A. M. Vogel, D. Gordon, and P. L. Lu

814 **Arrangement and possible function of actin filament bundles in ectoplasmic specializations of ground squirrel Sertoli cells.** A. W. Vogl and L. J. Soucy

826 **Intracellular movement of cell surface receptors after endocytosis: resialylation of asialotransferrin receptor in human erythroleukemia cells.** M. D. Snider and O. C. Rogers

835 **Phosphorylation-dependent subcellular translocation of a Ca^{2+}/calmodulin-dependent protein kinase produces an autonomous enzyme in *Aplysia* neurons.** T. Saitoh and J. H. Schwartz

843 **Genetics, evolution, and expression of the 68,000-mol-wt neurofilament protein: isolation of a cloned cDNA probe.** S. A. Lewis and N. J. Cowan

851 **Phorbol esters and horseradish peroxidase stimulate pinocytosis and redirect the flow of pinocytosed fluid in macrophages.** J. A. Swanson, B. D. Yirinec, and S. C. Silverstein

860 **Lymphocyte mechanical response triggered by cross-linking surface receptors.** C. Pasternak and E. L. Elson

873 **Localization of ribosomal protein S1 in the granular component of the interphase nucleolus and its distribution during mitosis.** B. Hügle, R. Hazan, U. Scheer, and W. W. Franke

887 **Centriole number and the reproductive capacity of spindle poles.** G. Sluder and C. L. Rieder

897 **Experimental separation of pronuclei in fertilized sea urchin eggs: chromosomes do not organize a spindle in the absence of centrosomes.** G. Sluder and C. L. Rieder

904 **Myosin and paramyosin are organized about a newly identified core structure.** H. F. Epstein, D. M. Miller III, I. Ortiz, and G. C. Berliner

916 **Synergistic effects of cyclic AMP and nerve growth factor on neurite outgrowth and microtubule stability of PC12 cells.** S. R. Heidemann, H. C. Joshi, A. Shechter, J. R. Fletcher, and M. Bothwell

928 **The major tyrosine-sulfated protein of the bovine anterior pituitary is a secretory protein present in gonadotrophs, thyrotrophs, mammotrophs, and corticotrophs.** P. Rosa, G. Fumagalli, A. Zanini, and W. B. Huttner

938 **Assembly of the sea urchin fertilization membrane: isolation of proteoliaisin, a calcium-dependent ovoperoxidase binding protein.** P. J. Weidman, E. S. Kay, and B. M. Shapiro

947 **Cytosolic free calcium-ion concentration in cleaving embryonic cells of *Oryzias latipes* measured with calcium-selective microelectrodes.** A. R. Shantz

955 **Defective temporal and spatial control of flagellar assembly in a mutant of *Chlamydomonas reinhardtii* with variable flagellar number.** G. M. W. Adams, R. L. Wright, and J. W. Jarvik

965 **Nile red: a selective fluorescent stain for intracellular lipid droplets.** P. Greenspan, E. P. Mayer, and S. D. Fowler

981 CORRECTION

VOLUME 100 NUMBER 4 APRIL 1985

Rapid Communications

1325 **An elevated free cytosolic Ca^{2+} wave follows fertilization in eggs of the frog, *Xenopus laevis*.** W. B. Busa and R. Nuccitelli

1330 **Muscarinic receptor–induced phosphoinositide hydrolysis at resting cytosolic Ca^{2+} concentration in PC12 cells.** L. M. Vicentini, A. Ambrosini, F. Di Virgilio, T. Pozzan, and J. Meldolesi

1334 **Topography of cell–glass apposition revealed by total internal reflection fluorescence of volume markers.** D. Gingell, I. Todd, and J. Bailey

1339 **Agents that activate protein kinase C reduce acetylcholine sensitivity in cultured myotubes.** F. Eusebi, M. Molinaro, and B. M. Zani

Regular Articles

997 **Intermediate filament cytoskeleton of amnion epithelium and cultured amnion epithelial cells: expression of epidermal cytokeratins in cells of a simple epithelium.** S. Regauer, W. W. Franke, and I. Virtanen

1010 **Three distinct distributions of F-actin occur during the divisions of the polar surface caps to produce pole cells in *Drosophila* embryos.** R. M. Warn, L. Smith, and A. Warn

1016 **Monoclonal antibodies against seven sites on the head and tail of *Dictyostelium* myosin.** G. Peltz, J. A. Spudich, and P. Parham

1024 **Site-specific inhibition of myosin-mediated motility in vitro by monoclonal antibodies.** P. F. Flicker, G. Peltz, M. P. Sheetz, P. Parham, and J. A. Spudich

1031 **Platelet-derived growth factor–induced alterations in vinculin and actin distribution in BALB/c-3T3 cells.** B. Herman and W. J. Pledger

1041 **An antiproliferative heparan sulfate species produced by postconfluent smooth muscle cells.** L. M. S. Fritze, C. F. Reilly, and R. D. Rosenberg

1050 **Identification of link proteins in canine synovial cell cultures and canine articular cartilage.** R. S. Fife, B. Caterson, and S. L. Myers

1056 **"Spiral asters" and cytoplasmic rotation in sea urchin eggs: induction in *Strongylocentrotus purpuratus* eggs by elevated temperature.** T. E. Schroeder and D. E. Battaglia

1063 **Subcellular localization of creatine kinase in *Torpedo* electrocytes: association with acetylcholine receptor–rich membranes.** T. Wallimann, D. Walzthöny, G. Wegmann, H. Moser, H. M. Eppenberger, and F. J. Barrantes

1073 **The muscarinic receptor of chick embryo cells: correlation between ligand binding and calcium mobilization.** G. Oettling, H. Schmidt, and U. Drews

1082 **Evidence for a tubulin-containing lipid-protein structural complex in ciliary membranes.** R. E. Stephens

1091 **Structural organization of interphase 3T3 fibroblasts studied by total internal reflection fluorescence microscopy.** F. Lanni, A. S. Waggoner, and D. L. Taylor

1103 **Development of cell surface linkage complexes in cultured fibroblasts.** W.-T. Chen, E. Hasegawa, T. Hasegawa, C. Weinstock, and K. M. Yamada

1115 **Identification of rat hepatocyte plasma membrane proteins using monoclonal antibodies.** A. L. Hubbard, J. R. Bartles, and L. T. Braiterman

1126 **Endogenous and exogenous domain markers of the rat hepatocyte plasma membrane.** J. R. Bartles, L. T. Braiterman, and A. L. Hubbard

1139 **Crystallization of the light-harvesting chlorophyll *a/b* complex within thylakoid membranes.** M. K. Lyon and K. R. Miller

1148 **Stability and movement of mRNAs and their encoded proteins in *Xenopus* oocytes.** D. R. Drummond, M. A. McCrae, and A. Colman

1157 **Distributions of vimentin and desmin in developing chick myotubes in vivo. II. Immunoelectron microscopic study.** K. T. Tokuyasu, P. A. Maher, and S. J. Singer.

1167 **Proteins transported in slow components A and B of axonal transport are distributed differently in the transverse plane of the axon.** K. Heriot, P. Gambetti, and R. J. Lasek

1173 **Cytochalasin treatment disrupts the endogenous currents associated with cell polarization in fucoid zygotes: studies of the role of F-actin in embryogenesis.** S. H. Brawley and K. R. Robinson

1185 **Influence of the centrosome on the structure of nucleated microtubules.** L. Evans, T. Mitchison, and M. Kirschner

1192 **Cell-substratum adhesion in chick neural retina depends upon protein–heparan sulfate interactions.** G. J. Cole, D. Schubert, and L. Glaser

1200 **Glucocorticoids increase amylase mRNA levels, secretory organelles, and secretion in pancreatic acinar AR42J cells.** C. D. Logsdon, J. Moessner, J. A. Williams, and I. D. Goldfine

1209 **The effect of viral infection on host protein synthesis and mRNA association with the cytoplasmic cytoskeletal structure.** A.-M. Bonneau, A. Darveau, and N. Sonenberg

1219 **Accelerated wound repair, cell proliferation, and collagen accumulation are produced by a cartilage-derived growth factor.** J. M. Davidson, M. Klagsbrun, K. E. Hill, A. Buckley, R. Sullivan, P. S. Brewer, and S. C. Woodward

1228 **A motile *Chlamydomonas* flagellar mutant that lacks outer dynein arms.** D. R. Mitchell and J. L. Rosenbaum

1235 **Uptake of gold- and [^{3}H]cholesteryl linoleate-labeled human low density lipoprotein by cultured rat granulosa cells: cellular mechanisms involved in lipoprotein metabolism and their importance to steroidogenesis.** L. G. Paavola, J. F. Strauss III, C. O. Boyd, and J. E. Nestler

1248 **Biogenesis of the polymeric IgA receptor in rat hepatocytes. I. Kinetic studies of its intracellular forms.** E. S. Sztul, K. E. Howell, and G. E. Palade

1255 **Biogenesis of the polymeric IgA receptor in rat hepatocytes. II. Localization of its intracellular forms by cell fractionation studies.** E. S. Sztul, K. E. Howell, and G. E. Palade

1262 **Distribution of fluorescently labeled tubulin injected into sand dollar eggs from fertilization through cleavage.** Y. Hamaguchi, M. Toriyama, H. Sakai, and Y. Hiramoto

1273 **Acrosomal reaction of *Thyone* sperm. III. The relationship between actin assembly and water influx during the extension of the acrosomal process.** L. G. Tilney and S. Inoué

1284 **Identification of a transmembrane glycoprotein specific for secretory vesicles of neural and endocrine cells.** K. Buckley and R. B. Kelly

1295 **Cellular uptake and intracellular localization of benzo(a)pyrene by digital fluorescence imaging microscopy.** A. L. Plant, D. M. Benson, and L. C. Smith

1309 **Digital imaging fluorescence microscopy: spatial heterogeneity of photobleaching rate constants in individual cells.** D. M. Benson, J. Bryan, A. L. Plant, A. M. Gotto, Jr., and L. C. Smith

VOLUME 100 NUMBER 5 MAY 1985

Rapid Communications

1789 **Ultrastructural and cytochemical demonstration of peroxisomes in cultured fibroblasts of patients with peroxisomal deficiency disorders.** J. A. Arias, A. B. Moser, and S. L. Goldfischer

1793 **Monoclonal antibody to intermediate filament antigen cross-reacts with higher plant cells.** P. J. Dawson, J. S. Hulme, and C. W. Lloyd

1799 **Slow posttranslational modification of a neurofilament protein.** G. S. Bennett and C. DiLullo

Regular Articles

1351 **Tubular structures in S49 mouse lymphoma are regulated through in vitro host-cell interaction and in vitro Interferon treatment.** J. Hochman, N. Mador, and A. Panet

1357 **Depolymerization of microtubules increases the motional freedom of molecular probes in cellular plasma membranes.** A. Aszalos, G. C. Yang, and M. M. Gottesman

1363 **Calcium restriction prolongs metaphase in dividing *Tradescantia* stamen hair cells.** P. K. Hepler

1369 **Triton X-100 extraction of P815 tumor cells: evidence for a plasma membrane skeleton structure.** J. R. Apgar, S. H. Herrmann, J. M. Robinson, and M. F. Mescher.

1379 **Contractile proteins in pericytes. I. Immunoperoxidase localization of tropomyosin.** N. C. Joyce, M. F. Haire, and G. E. Palade

1387 **Contractile proteins in pericytes. II. Immunocytochemical evidence for the presence of two isomyosins in graded concentrations.** N. C. Joyce, M. F. Haire, and G. E. Palade

1396 **Differentiated microdomains of the luminal plasmalemma of murine muscle capillaries: segmental variations in young and old animals.** M. Simionescu, N. Simionescu, F. Santoro, and G. E. Palade

1408 **Lateral diffusion in nuclear membranes.** M. Schindler, J. F. Holland, and M. Hogan

1415 **Cell-cell interactions promote mammary epithelial cell differentiation.** J. F. Levine and F. E. Stockdale

1423 **The cercarial glycocalyx of *Schistosoma mansoni*.** J. C. Samuelson and J. P. Caulfield

1435 **Compartmentalization of algal bioluminescence: autofluorescence of bioluminescent particles in the dinoflagellate *Gonyaulax* as studied with image-intensified video microscopy and flow cytometry.** C. H. Johnson, S. Inoué, A. Flint, and J. W. Hastings

1447 **Calcium control of ciliary reversal in ionophore-treated and ATP-reactivated comb plates of ctenophores.** S. Nakamura and S. L. Tamm

1455 **Microvillus 110K-calmodulin: effects of nucleotides on isolated cytoskeletons and the interaction of the purified complex with F-actin.** K. Verner and A. Bretscher

1466 **Are cross-bridging structures involved in the bundle formation of intermediate filaments and the decrease in locomotion that accompany cell aging?** E. Wang

1474 **The cytoplasmic filament system in critical point–dried whole mounts and plastic-embedded sections.** H. Ris

1488 **Differences in the volume distributions of human lung mast cell granules and lipid bodies: evidence that the size of these organelles is regulated by distinct mechanisms.** I. Hammel, A. M. Dvorak, S. P. Peters, E. S. Schulman, H. F. Dvorak, L. M. Lichtenstein, and S. J. Galli

1493 **Isolation and characterization of a factor from calf serum that promotes the pigmentation of embryonic and transformed melanocytes.** J. A. Jerdan, H. H. Varner, J. H. Greenberg, V. J. Horn, and G. R. Martin

1499 **Fate of tetanus toxin bound to the surface of primary neurons in culture: evidence for rapid internalization.** D. R. Critchley, P. G. Nelson, W. H. Habig, and P. H. Fishman

1508 **Transforming growth factor-β modulates the high-affinity receptors for epidermal growth factor and transforming growth factor-α.** J. Massagué

1515 **Expression of amplified DNA sequences for ornithine transcarbamylase in HeLa cells: arginine residues may be required for mitochondrial import of enzyme precursor.** A. L. Horwich, W. A. Fenton, F. A. Firgaira, J. E. Fox, D. Kolansky, I. S. Mellman, and L. E. Rosenberg

1522 **Source and sinks for the calcium released during fertilization of single sea urchin eggs.** A. Eisen and G. T. Reynolds

1528 **Distribution of the cell substratum attachment (CSAT) antigen on myogenic and fibroblastic cells in culture.** C. H. Damsky, K. A. Knudsen, D. Bradley, C. A. Buck, and A. F. Horwitz

1540 **Control by fibroblast growth factor of differentiation in the BC_3H1 muscle cell line.** B. Lathrop, E. Olson, and L. Glaser

1548 **Anion transporter: highly cell-type-specific expression of distinct polypeptides and transcripts in erythroid and nonerythroid cells.** J. V. Cox, R. T. Moon, and E. Lazarides

1558 **Isolation and characterization of multivesicular bodies from rat hepatocytes: an organelle distinct from secretory vesicles of the Golgi apparatus.** C. A. Hornick, R. L. Hamilton, E. Spaziani, G. H. Enders, and R. J. Havel

1570 **The general organization of protein in HeLa 40S nuclear ribonucleoprotein particles.** L. Lothstein, H. P. Arenstorf, S.-Y. Chung, B. W. Walker, J. Wall, J. C. Wooley, and W. M. LeStourgeon

1582 **Characterization of maturation-dependent, extrinsic proteins of the rat sperm surface.** J. M. Rifkin and G. E. Olson

1592 **Identification of osteoclast-specific monoclonal antibodies.** M. J. Oursler, L. V. Bell, B. Clevinger, and P. Osdoby

1601 **Crypt cell development in newborn rat small intestine.** A. Quaroni

1611 **Development of fetal rat intestine in organ and monolayer culture.** A. Quaroni

1623 **Reversible chromosome condensation induced in *Drosophila* embryos by anoxia: visualization of interphase nuclear organization.** V. E. Foe and B. M. Alberts

1637 **Active maturation-promoting factor is present in mature mouse oocytes.** R. A. Sorensen, M. S. Cyert, and R. A. Pedersen

1641 **The inhibition of neutrophil granule enzyme secretion and chemotaxis by pertussis toxin.** E. L. Becker, J. C. Kermode, P. H. Naccache, R. Yassin, M. L. Marsh, J. J. Munoz, and R. I. Sha'afi

1647 **Role of myosin in terminal web contraction in isolated intestinal epithelial brush borders.** T. C. S. Keller III, K. A. Conzelman, R. Chasen, and M. S. Mooseker

1656 **Identification and localization of immunoreactive forms of caldesmon in smooth and nonmuscle cells: a comparison with the distributions of tropomyosin and α-actinin.** A. Bretscher and W. Lynch

1664 **Invertase signal and mature sequence substitutions that delay intercompartmental transport of active enzyme.** I. Schauer, S. Emr, C. Gross, and R. Schekman

1676 **Endocytosis and degradation of interstitial retinol-binding protein: differential capabilities of cells that border the interphotoreceptor matrix.** J. G. Hollyfield, H. H. Varner, M. E. Rayborn, G. I. Liou, and C. D. Bridges

1682 **Polymerization of tubulin in vivo: direct evidence for assembly onto microtubule ends and from centrosomes.** B. J. Soltys and G. G. Borisy

1690 **Localization of phosphatidylcholine in outer envelope membrane of spinach chloroplasts.** A.-J. Dorne, J. Joyard, M. A. Block, and R. Douce

1698 **Association of the postsynaptic 43K protein with newly formed acetylcholine receptor clusters in cultured muscle cells.** H. B. Peng and S. C. Froehner

1706 **Topoisomerase II is a structural component of mitotic chromosome scaffolds.** W. C. Earnshaw, B. Halligan, C. A. Cooke, M. M. S. Heck, and L. F. Liu

1716 **Localization of topoisomerase II in mitotic chromosomes.** W. C. Earnshaw and M. M. S. Heck

1726 **Posttranslational control of membrane-skeleton (ankyrin and $\alpha\beta$-spectrin) assembly in early myogenesis.** W. J. Nelson and E. Lazarides

1736 **Gliding movement of and bidirectional organelle transport along single native microtubules from squid axoplasm: evidence for an active role of microtubules in cytoplasmic transport.** R. D. Allen, D. G. Weiss, J. H. Hayden, D. T. Brown, H. Fujiwake, and M. Simpson

1753 **Fluorescent morphological probe for hyaluronate.** C. B. Knudson and B. P. Toole

1759 **Locations of Z-DNA in polytene chromosomes.** F. Lancillotti, M. C. Lopez, C. Alonso, and B. D. Stollar

1767 **Electron microscopic characterization of chick embryonic skeletal muscle proteoglycans.** D. G. Pechak, D. A. Carrino, and A. I. Caplan

1777 **Pathways involved in targeting and secretion of a lysosomal enzyme in *Dictyostelium discoideum*.** R. C. Mierendorf, Jr., J. A. Cardelli, and R. L. Diamond

1805 PLACEMENT SERVICE NOTICES

VOLUME 100 NUMBER 6 JUNE 1985

Rapid Communications

2019 **In cow anterior pituitary, growth hormone and prolactin can be packaged in separate granules of the same cell.** G. Fumagalli and A. Zanini

2025 **Embryonic chicken skeletal, cardiac, and smooth muscles express a common embryo-specific myosin light chain.** H. Takano-Ohmuro, T. Obinata, M. Kawashima, T. Masaki, and T. Tanaka

Regular Articles

1817 **Involvement of zinc in the regulation of pH_i, motility, and acrosome reactions in sea urchin sperm.** D. L. Clapper, J. A. Davis, P. J. Lamothe, C. Patton, and D. Epel

1825 **Discoidin I, an endogenous lectin, is externalized from *Dictyostelium discoideum* in multilamellar bodies.** S. H. Barondes, P. L. Haywood-Reid, and D. N. W. Cooper

1834 **The microsporidian spore invasion tube. IV. Discharge activation begins with pH-triggered Ca^{2+} influx.** J. Pleshinger and E. Weidner

1839 **Glycoproteins of the lysosomal membrane.** V. Lewis, S. A. Green, M. Marsh, P. Vihko, A. Helenius, and I. Mellman

1848 **Binding of laminin to type IV collagen: a morphological study.** A. S. Charonis, E. C. Tsilibary, P. D. Yurchenco, and H. Furthmayr

1854 **Outer plaque assembly and spore encapsulation are defective during sporulation of adenylate cyclase–deficient mutants of *Saccharomyces cerevisiae*.** I. Uno, K. Matsumoto, A. Hirata, and T. Ishikawa

1863 **Effect of taxol on secretory cells: functional, morphological, and electrophysiological correlates.** J. Thuret-Carnahan, J.-L. Bossu, A. Feltz, K. Langley, and D. Aunis

1875 **Modulation of the asymmetry of sea urchin sperm flagellar bending by calmodulin.** C. J. Brokaw and S. M. Nagayama

1884 **Ligand-induced changes in the location of actin, myosin, 95K (α-actinin), and 120K protein in amebae of *Dictyostelium discoideum*.** J. M. Carboni and J. S. Condeelis

1894 **Effects of ammonia on processing and secretion of precursor and mature lysosomal enzymes from macrophages of normal and pale ear mice: evidence for two distinct pathways.** J. A. Brown, E. K. Novak, and R. T. Swank

1905 **Subunit structure of paired helical filaments in Alzheimer's disease.** C. M. Wischik, R. A. Crowther, M. Stewart, and M. Roth

1913 **Elongation arrest is not a prerequisite for secretory protein translocation across the microsomal membrane.** V. Siegel and P. Walter

1922 **Permeabilization of rat hepatocytes with *Staphylococcus aureus* α-toxin.** B. F. McEwen and W. J. Arion

1930 **An immunological approach to enrich a mitotic stimulator and to reveal G_2-phase specific proteins in *Physarum polycephalum*.** P. Gröbner and P. Loidl

1934 **The role of membrane–membrane interactions in the regulation of endothelial cell growth.** R. L. Heimark and S. M. Schwartz

1941 **Cooperativity between Sertoli cells and testicular peritubular cells in the production and deposition of extracellular matrix components.** M. K. Skinner, P. S. Tung, and I. B. Fritz

1948 **Detachment of cells from culture substrate by soluble fibronectin peptides.** E. G. Hayman, M. D. Pierschbacher, and E. Ruoslahti

1955 **The binding of vimentin to human erythrocyte membranes: a model system for the study of intermediate filament–membrane interactions.** S. D. Georgatos and V. T. Marchesi

1962 **Site specificity in vimentin–membrane interactions: intermediate filament subunits associate with the plasma membrane via their head domains.** S. D. Georgatos, D. C. Weaver, and V. T. Marchesi

1968 **The small subunit of ribonucleotide reductase is encoded by one of the most abundant translationally regulated maternal mRNAs in clam and sea urchin eggs.** N. M. Standart, S. J. Bray, E. L. George, T. Hunt, and J. V. Ruderman

1977 **Expression of a developmentally regulated antigen on the surface of skeletal and cardiac muscle cells.** S. J. Kaufman, R. F. Foster, K. R. Haye, and L. E. Faiman

1988 **Origin of the glomerular basement membrane visualized after in vivo labeling of laminin in newborn rat kidneys.** D. R. Abrahamson

2001 **Characterization of a 36,000-dalton protein from the surface of Madin-Darby canine kidney cells involved in cell attachment and spreading.** M. Sabanero, A. Gonzalez-Robles, and I. Meza

2008 **Substructure of inner dynein arms, radial spokes, and the central pair/projection complex of cilia and flagella.** U. W. Goodenough and J. E. Heuser
